This page is for OPH-CNE staff to add requirements for STARGATE. You should start by reading the [Endpoint Initiative Requirements](#). Your requirement may have already been captured.

Some headings have been added to get you started....

## Contents

- [1 How should the file system be rendered?](#)
- [2 How do you want to search the file system?](#)
- [3 How do you want to get tasked by customers?](#)
- [4 What should appear on the summary pages? What about summary pages for a Project or Implant?](#)
- [5 Embedded Comments](#)
- [6 What would CNE need from Network diagrams?](#)
- [7 What input is most important \(ipconfig/netstat/dns/arps/....\) ?](#)
- [8 Scripts](#)
- [9 Visualising non-DareDevil logs](#)
- [10 Add a new section here!](#)

**[[edit](#)] How should the file system be rendered?**

- I would like to be able to use STARGATE to view the files directly from the S drive. GCHQ

## STARGATE

- [User Guide](#)
- [Bugs & Feedback](#)

- [Surgery](#)
- [Support](#)

### Administration

- [User Management tool](#)
- [Plugins](#)

## VORPAL SWORD

- [User Guide](#)
- [Bugs & Feedback](#)
- [Development](#)
- [Version history](#)

## CLOTHO 2

- [Interface from ROYAL MANTLE](#)

## Architecture

- [Connectivity](#)
- [ERIDANUS](#)
- [CHEYENNE MOUNTAIN](#)
- [CHEYENNE MOUNTAIN2](#)

has a site wide license for OutsideIn (QuickView uses this behind the scenes). You can convert around ~350 document formats into HTML for viewing safely. This is not meant to replace udaq but would be a convenient and safe halfway-house to view files quickly for tactical operational reasons.

User: [REDACTED]

[\[edit\]](#) **How do you want to search the file system?**

[\[edit\]](#) **How do you want to get tasked by customers?**

[\[edit\]](#) **What should appear on the summary pages? What about summary pages for a Project or Implant?**

[\[edit\]](#) **Embedded Comments**

What form should they take? Do you want to be able to add attachments or hyperlinks. Do you want to be alerted when a comment is added to your project?

[\[edit\]](#) **What would CNE need from Network diagrams?**

[\[edit\]](#) **What input is most important (ipconfig/netstat/dns/arps/....) ?**

[\[edit\]](#) **Scripts**

Incorporate scripts detailed in the [TDE wiki](#) into STARGATE, eg;

- Email project lead (or interested party) when a volume manager event occurs. User: [REDACTED]
- *Please add more ideas!*

[\[edit\]](#) **Visualising non-DareDevil logs**

- I need to be able to view logs from unix ops | [REDACTED]
- I need to be able to view logs from masquerades (directory listings from FTP servers)  
User: [REDACTED]
- I need to be able to view logs from ops where i exploit on to the box and just use legspin  
(THICKISH ALPHA) User: [REDACTED]

[\[edit\]](#) **Add a new section here!**
